

StrategyBlocks Downloadable Guide

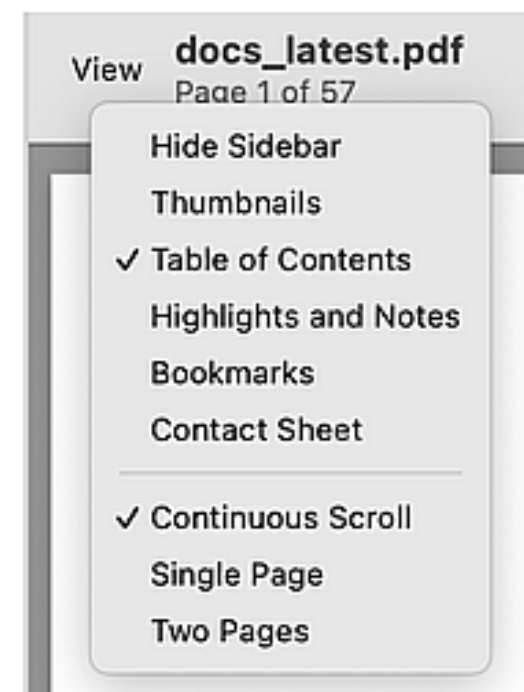

About

This downloadable PDF is based on the live site and contains all of the same content at the time of downloading. As the live site is updated this guide will become out of date and will need to be redownloaded.

Navigation

You can navigate quickly between pages using the Table of Contents or Bookmarks features in your PDF viewer. This will give you a side bar similar to the one of the live site.

The PDF is selectable so you can copy text, you can also search the document for keywords using Control F on your keyboard.

Limitations

Links within the documentation, which on the live site would take you between pages, will not work in the PDF version. It should be clear from the link text which page to go to via the Table of Contents side menu.
